

Sump sweeper piping

Water treatment and filtration equipment

Key benefits

- Improved filtration system performance
- Year-round system hygiene
- Less equipment cleaning
- Prevents under deposit corrosion

For optimal cooling performance and maximum system hygiene install also

- an automatic bleed control (BCP 0 D)
- water treatment equipment for liquid (BCP 2 D BCP 3 D) chemicals
- a filtration system (PF 64 separator)

A sump sweeper piping system **increases water circulation and agitation in** the basin and is designed to be used in combination with a <u>filtration system</u>.

Sump sweeper piping can be factory-installed or retrofitted on-site.

Want to install sump sweeper piping? Contact your local <u>BAC representative</u> for more information.
